● **Online Debate on 'What are the Basic Rights of a Child and How can these be Protected?' on 30 January 2022**

CHILD RIGHTS & ROLE OF TEACHER

Children's rights are human rights that are accustomed explicitly to the children needs, wants and overall well-being. They take into account their fragility, specificities and age-appropriate requirements. Children's rights aim to take into account the necessity of the development of a child. Child rights go beyond just human rights, which exist to ensure fair and proper treatment of people across the world, and promote their well-being. Children, defined as any person under the age of 18, need more than just human rights due to a set of unique needs stemming from their vulnerabilities. All children deserve equality, despite their differences. They are entitled to all of their rights, no matter what race, colour, religion, language, ethnicity, gender or abilities define them.

Teachers play a major role in ensuring that all our children live in safety and dignity in a protective and nurturing environment. Hence it is imperative for every teacher to be aware of the many prevailing social evils which impact adversely on the development of children, and also of the legal provisions which exist and which can help in safeguarding the interests of the child. And thus contribute to the protection/promotion of rights of our children.

With this intention, we organize a Debate on the theme "CHILD RIGHTS: What are the basic rights of a child and how can these be protected?" for the Prospective Teachers to express their views on various strategies and suggestions for the protection of children in today's context. All are invited.
